Service User Charter

Each service user will have the right to:

be treated as an individual

dignity, privacy and respect

participate in the planning of your care or support plan

receive care or support appropriate to your needs

expect confidentiality at all times

independence and accountability for your own actions

undertake individual tasks

equal opportunities in relation to services

access a formal complaints procedure and to be represented by a friend or advisor if you so wish

Carbeth House

Carbeth House is a registered care home supporting adults who experience enduring mental health problems to live independently in the community. The project which is based in the north west of Glasgow consists of a core building, which is a purpose built three story block of nine individual flats, and cluster flats located nearby. There is a staff flat situated within the core building.

Referral Criteria

Carbeth House Project provides services for adults over 18 years of age who experience mental health problems. Referrals are made by local authority Care Managers or health professionals. A single shared assessment will be carried out with the service users needs and desires at the centre of all discussions. Service users will be invited to visit the project prior to moving, in order to get to know staff and other service users and to ensure that they are confident that the service will meet their needs. The first four weeks after admission to the service are an assessment period after which a review takes place to ensure suitability of the placement.

Services Offered

24 hour flexible support from an experienced and committed staff team

A named key worker

A person centred and regularly reviewed care support plan developed with the service user which recognises their individual rights, needs and choices

A drop-in service within the communal area of the staff flat

Involvement in project and service development via participation in service user meetings

A safe, secure and enabling living environment

Support to enable the service user to expand their capabilities and achievements by accessing a range of community services, resources and activities; to live a life rich in purpose and personal fulfilment and to achieve all they can

Support to enable the service users to develop and maintain social networks, recreational, educational and / or occupational interests

Support to access appropriate health care, counselling and advice

Trained staff who will support the service user in a flexible and professional manner

“

**It's good to have your privacy,
have company and be able
to do your own thing.**
